Key Risks

**Foreign Currency Risk:** Because all or a portion of the Fund are being invested in securities denominated in foreign currencies, the Fund’s exposure to foreign currencies and changes in the value of foreign currencies versus the Base Currency may result in reduced returns for the Fund, and the value of certain foreign currencies may be subject to a high degree of fluctuation. That is a factor to consider when investing in a Food ETF.

**Industry or Sector Concentration Risk:** The ETF’s assets may be concentrated in one or more particular sectors or industries. A Food ETF may be subject to the risk that economic, political or other conditions that have a negative effect on the relevant sectors or industries will negatively impact the Fund’s performance to a greater extent than if the Fund’s assets were invested in a wider variety of sectors or industries.

**Risk of investing in smaller companies:** The securities of smaller companies may be more volatile and less liquid than the securities of large companies. Smaller companies, when compared with larger companies, may have a shorter history of operations, fewer financial resources, less competitive strength, may have a less diversified product line, may be more susceptible to market pressure and may have a smaller market for their securities. This is an additional factor to consider when investing in a Food ETF.

For more information on risks, please see the “Risk Factors” section of the relevant Fund’s prospectus, available on [www.vaneck.com](http://www.vaneck.com).
