

## Statement on principal adverse impacts of investment decisions on sustainability factors

### Financial market participant VanEck Asset Management B.V. (LEI: 724500XJ1KZW847HI811)

#### Résumé

VanEck Asset Management B.V. (« VanEck ») (LEI 724500XJ1KZW847HI811) évalue les principales répercussions négatives de ses décisions d'investissement sur les facteurs de durabilité. Le présent document constitue la déclaration consolidée sur les principales répercussions négatives sur les facteurs de durabilité de VanEck Asset Management B.V., VanEck UCITS ETFs plc, VanEck ICAV et VanEck ETFs N.V.

Cette déclaration sur les principales répercussions négatives sur les facteurs de durabilité couvre la période de référence allant du 1er janvier 2023 au 31 décembre 2023.

VanEck tient compte des répercussions négatives sur les facteurs de durabilité pour les OPCVM à gestion passive de VanEck (« ETF ») et les OPCVM à gestion active de VanEck (« fonds actifs »).

Les décisions d'investissement peuvent affecter le monde et vice versa. Investir dans les entreprises et les gouvernements peut affecter positivement l'environnement et la société, mais il peut aussi avoir un impact négatif sur les facteurs de durabilité.

La législation européenne exige des acteurs du marché financier comme VanEck qu'ils indiquent s'ils tiennent compte ou non des effets négatifs sur le capital, conformément à la législation européenne des décisions d'investissement sur les facteurs de durabilité. La législation définit les facteurs de durabilité comme étant des questions environnementales, sociales, de lutte contre la corruption, des employés, de respect des droits de l'homme et de lutte contre la corruption. VanEck tient compte de 14 répercussions négatives des décisions d'investissement sur les facteurs de durabilité pour les entreprises et 2 indicateurs sont pris en compte pour l'investissement dans les États souverains et les institutions supranationales. Les répercussions négatives prises en compte sont les suivantes :

#### Entreprises

##### Émissions de gaz à effet de serre

- Émissions de GES
- Empreinte carbone
- Intensité des GES des entreprises en quête d'investissements
- Exposition à des sociétés actives dans le secteur des combustibles fossiles
- Part de la consommation et de la production d'énergies non renouvelables
- Intensité de la consommation d'énergie par secteur à fort impact climatique

##### Biodiversité

- Activités ayant un impact négatif sur les zones sensibles en matière de biodiversité

## Eau

- Émissions dans l'eau

## Déchets

- Rapport entre les déchets dangereux et les déchets radioactifs

## Questions sociales et relatives aux employés

- Violations des principes du Pacte mondial des Nations unies et des principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.
- Absence de processus et de mécanismes de contrôle de la conformité aux principes du Pacte mondial des Nations unies et aux principes directeurs de l'OCDE à l'intention des entreprises multinationales.
- Écart de rémunération entre les sexes non ajusté
- Diversité des sexes au sein du Conseil d'administration
- Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques)

## États souverains et institutions supranationales

- Intensité des GES
- Pays d'investissement soumis à des atteintes aux droits sociaux

## Indicateurs supplémentaires pour les principales répercussions négatives sur les facteurs de durabilité :

- Espèces naturelles et zones protégées
- Cas de mesures prises insuffisantes pour remédier aux violations des normes anticorruption

L'approche et la mesure dans laquelle les principales répercussions négatives spécifiques sont prises en compte diffèrent en fonction du fonds. Les informations ci-dessous offrent une description plus approfondie de ces considérations pour chacune des principales répercussions négatives envisagées.

---

## Summary

VanEck Asset Management B.V. ("VanEck") (LEI 724500XJ1KZW847HI811) considers principal adverse impacts of its investment decisions on sustainability factors. The present statement is the consolidated statement on principal adverse impacts on sustainability factors of VanEck Asset Management B.V., VanEck UCITS ETFs plc., VanEck ICAV and VanEck ETFs N.V.

This statement on principal adverse impacts on sustainability factors covers the reference period from 1 January 2023 to 31 December 2023.

VanEck considers adverse impacts on sustainability factors for VanEck's passively managed UCITS ("ETFs") and VanEck's actively managed UCITS ("Active Funds").

Investment decisions can impact the world and vice versa. Investing in companies and governments can positively impact the environment and society, however, it may also have negative impacts on sustainability factors.

European legislation requires financial market participants such as VanEck to disclose whether they take into account principal adverse impacts as defined in European legislation of investment decisions on sustainability factors. Sustainability factors are defined in the legislation as environmental, social, anti-bribery and employee matters, respect for human rights, and anti-corruption. 14 adverse impacts of investment decisions on sustainability factors are considered by VanEck for companies and 2 indicators are considered for the investment in sovereigns and supranationals. The considered adverse impacts are as follows:

### **Companies**

#### Greenhouse gas emissions

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector

#### Biodiversity

- Activities negatively affecting biodiversity-sensitive areas

#### Water

- Emissions to water

#### Waste

- Hazardous waste and radioactive waste ratio

#### Social and employee matters

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Unadjusted gender pay gap
- Board gender diversity
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

**Sovereigns and Supranationals**

- GHG intensity
- Investee countries subject to social violations

**Additional indicators for principal adverse impacts on sustainability factors:**

- Natural species and protected areas
- Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery

The approach and extent to which specific principal adverse impacts are considered differs per fund. In the information below, this is further described for each of the considered principal adverse impacts.

### Description of the principal adverse impacts on sustainability factors

The principal adverse impacts considered for VanEck’s ETFs and Active Funds are described in the table below. Each principal adverse impact is defined as an indicator and the corresponding metric is included. In addition, an explanation is given for the applicability of the indicator and which activities are undertaken and planned to address the adverse impacts. In general, funds can be distinguished by not having sustainability characteristics (Article 6), promoting environmental and/or social characteristics (Article 8), and having a sustainable investment objective (Article 9). The type of activities can be divided between voting and integration in the index for VanEck’s ETFs or integration in investment decisions, engagement or voting for the Active Funds. Each year the table will be updated with the scores of the past year and its preceding year to demonstrate a historical comparison of the adverse impact of VanEck’s investments.

Adverse sustainability indicator	Metric	Impact year 2023	Impact year 2022*	Explanation	Actions taken, and actions planned and targets set for the next reference period	
Greenhouse gas emissions	1. GHG emissions	Scope 1 GHG emissions	304,466.98	264,305.38	2022 Coverage: 92.12% 2023 Coverage: 93.47%	<p><b>Integration in index of VanEck ETFs</b> For certain Article 8 ETFs and all Article 9 ETFs, VanEck utilises ESG data relating to carbon emissions, carbon footprint, GHG intensity and exposure to the fossil fuel sector. For the relevant Article 8 ETFs, data from ESG data providers is used for the screening of investments and exclusion of companies based on performance. Company performance may be evaluated by indicators such as ability to transition to a lower pollution business, industry data on carbon emissions, failure to mitigate climate change impacts, carbon risk, and greenhouse gas emissions for controversy score. It may additionally be used for the composition of exclusions lists whereby companies with unacceptable greenhouse gas emissions or are involved in production of coal or coal-based energy are excluded.</p> <p>For all Article 9 funds:</p> <ul style="list-style-type: none"> <li>• Norm-based research is conducted on environmental protection whereby companies with “failure to mitigate climate change impacts” are excluded.</li> </ul>
		Scope 2 GHG emissions	140,393.31	118,607.78	2022 Coverage: 92.12% 2023 Coverage: 93.47%	
		Scope 3 GHG emissions	3,132,585.61	2,367,636.92	2022 Coverage: 92.12% 2023 Coverage: 93.47%	
		Total GHG emissions	3,577,445.91	2,750,550.07	2022 Coverage: 92.12% 2023 Coverage: 93.47%	
		2. Carbon footprint	Carbon footprint	598.21	546.10	
	3. GHG intensity of investee companies	GHG intensity of investee companies	1,594.89	2,000.78	2022 Coverage: 91.46% 2023 Coverage: 92.75%	
	4. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	9.25%	6.91%	2022 Coverage: 92.55% 2023 Coverage: 94.03%	

						<ul style="list-style-type: none"> <li>Exclusions apply for companies with revenues of more than 5% related to involvement in fossil fuels, thermal coal mining and oil sands.</li> </ul> <p>For the remaining Article 8 and all Article 6 ETFs, the indicators are not considered in the index construction.</p> <p><b>Voting VanEck ETFs</b>  For all equity ETFs, the Glass Lewis ESG tilted policy is applied, whereby it supports proposals requesting companies to develop greenhouse gas emissions reduction goals and other proactive means to mitigate a company's environmental footprint.</p> <p><b>Engagement in VanEck ETFs</b>  VanEck intends to engage, during the next reference period, with some companies which are components of the Indexes of several VanEck ETFs, via a third-party.</p> <p><b>Integration in Active Funds (Article 8)</b>  Exclusion of companies that are unacceptable greenhouse gas emitters and/or companies involved in production of coal or coal-based energy in accordance with the Norges-Bank Exclusionary list.</p> <p><b>Engagement in Active Funds (Article 8)</b>  Engagement is integral to the Active Funds. During the investment period, the Investment Teams engage with management and raise sustainability issues relevant to that investment and industry. The Investment Teams continue to engage with and monitor the investments throughout the investment cycle.</p> <p><b>Proxy Voting in the VE EME UCITS Fund (Article 8)</b></p>
--	--	--	--	--	--	---

						Principal adverse impacts are considered as part of the Glass Lewis voting policy, whereby casted votes also regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.
5.	Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources	Consumption – 46.48%  Production – 1.13%	Consumption – 48.52%  Production – 0.88%	2022 Coverage (consumption): 58.58% 2022 Coverage (Production): 87.90% 2023 Coverage (consumption): 60.24% 2023 Coverage (Production): 87.20%	<b>Voting VanEck ETFs</b> For all equity ETFs, the Glass Lewis ESG tilted policy is applied, whereby it supports proposals for companies to increase disclosure on renewable energy strategies.
6.	Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	Agriculture, Forestry & Fishing - 0.00;  Mining and Quarrying – 0.24;  Manufacturing – 2.22;  Electricity, Gas, Steam and Air Conditioning Supply – 0.02;	Agriculture, Forestry & Fishing - 0.00;  Mining and Quarrying – 0.05;  Manufacturing - 0.08;  Electricity, Gas, Steam and Air Conditioning Supply – 0.03;	2022 Coverage: Agriculture, Forestry & Fishing - 0.03% (81.29% Applicable);  Mining and Quarrying – 3.92% (13.65% Applicable);  Manufacturing – 25.98% (81.05% Applicable);  Electricity, Gas, Steam and Air Conditioning Supply – 0.55% (58.3% Applicable);	<b>Integration in index of VanEck ETFs</b> For certain Article 8 ETFs, VanEck utilises ESG data relating to energy consumption. This indicator strongly relates to the above indicators relating to greenhouse gas emissions. For the relevant Article 8 ETFs, data specifically relating to energy consumption from ESG data providers, is used for the screening investment and exclusion of companies based on performance. Company performance may include a score on resource efficiency relating to various resources among which energy or energy use are analysed as part of a controversy score.  <b>Voting VanEck ETFs</b> For all equity ETFs, the Glass Lewis ESG tilted policy is applied, whereby it supports proposals

			<p>Water Supply, Sewerage, Waste Management and Remediation Activities – 0.00;</p> <p>Construction - 0.00;</p> <p>Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles - 0.00;</p> <p>Transportation and Storage – 0.01;</p> <p>Real Estate Activities - 0.01</p>	<p>Water Supply, Sewerage, Waste Management and Remediation Activities – 0.00;</p> <p>Construction - 0.00;</p> <p>Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles - 0.00;</p> <p>Transportation and Storage – 0.01;</p> <p>Real Estate Activities - 0.00</p>	<p>Water Supply, Sewerage, Waste Management and Remediation Activities – 0.05% (36.27% Applicable);</p> <p>Construction - 0.00% (2% Applicable);</p> <p>Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles - 1.14% (44.55% Applicable);</p> <p>Transportation and Storage – 0.7% (81.75% Applicable);</p> <p>Real Estate Activities - 0.19% (2.81% Applicable)</p> <p>2023 Coverage: Agriculture, Forestry &amp; Fishing - 0.04% (99.25% Applicable);</p> <p>Mining and Quarrying – 9.7% (34.11% Applicable);</p> <p>Manufacturing – 29.69% (85.58% Applicable);</p> <p>Electricity, Gas, Steam and Air Conditioning</p>	<p>for companies that request efforts towards increased energy efficiency.</p>

					<p>Supply – 0.6% (72.02% Applicable);</p> <p>Water Supply, Sewerage, Waste Management and Remediation Activities – 0.09% (41.74% Applicable);</p> <p>Construction - 0.03% (26.41% Applicable);</p> <p>Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles - 1.29% (44.26% Applicable);</p> <p>Transportation and Storage – 0.61% (80.83% Applicable);</p> <p>Real Estate Activities – 1.03% (23.08% Applicable)</p>	
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	0.50%	0.04%	<p>2022 Coverage: 92.6%</p> <p>2023 Coverage: 94.05%</p>	<p><b>Integration in index of VanEck ETFs</b></p> <p>For certain Article 8 ETFs and all Article 9 ETFs, VanEck utilises ESG data relating to biodiversity. For relevant Article 8 ETFs, data from ESG data providers is used for the screening of investments and exclusion of companies based on performance. Company performance may be in regards to the protection of biodiversity and land use or part of risk controversy score.</p> <p>For all Article 9 ETFs, Norm-based research is conducted on environmental protection whereby companies with failure to prevent</p>

						<p>depletion of biodiversity and/or deforestation, or are involved in illegal logging are excluded in case of a very severe score.</p> <p>For the remaining Article 8 and all Article 6 ETFs, the indicator is not considered in the index construction.</p> <p><b>Integration in Active Funds (Article 8)</b> Exclusion of companies that are involved in severe environmental damage in accordance with the Norges Bank Exclusionary list.</p> <p><b>Engagement in VanEck ETFs</b> VanEck intends to engage, during the next reference period, with some companies which are components of the Indexes of several VanEck ETFs, via a third-party.</p> <p><b>Engagement in Active Funds (Article 8)</b> Engagement is integral to the Active Funds. During the investment period, the Investment Teams engage with management and raise sustainability issues relevant to that investment and industry. The Investment Teams continue to engage with and monitor the investments throughout the investment cycle.</p> <p><b>Proxy Voting in the VE EME UCITS Fund (Article 8)</b> Principal adverse impacts are considered as part of the Glass Lewis voting policy, whereby casted votes also regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.</p>
--	--	--	--	--	--	--

Water	8. Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average	0.00	0.00	<p>2022 Coverage: 2.85% Applicable Coverage – 15.14%</p> <p>2023 Coverage: 2.4% Applicable Coverage – 11.97%</p>	<p><b>Integration in index of VanEck ETFs</b> For certain Article 8 ETFs and all Article 9 ETFs VanEck utilises ESG data relating to emissions to water. For the relevant Article 8 ETFs, data from ESG data providers is used for the screening of investments and excluding companies based on their performance. Performance may be in regards to discharges and releases of water as part of a controversy risk score, resource consumption or water intensity as part of an ESG score. For all Article 9 ETFs , Norm-based research is conducted on emissions to water whereby companies with failure to prevent water pollution are excluded if of a very severe score For the remaining article 8 and all article 6 ETFs, the indicator is not considered in the index construction.</p> <p><b>Voting VanEck ETFs</b> For all equity ETFs, the Glass Lewis ESG tilted policy is applied, whereby it, supports proposals for companies requesting to adopt policies or improve disclosure of water usage and impact on water supplies.</p>
Waste	9. Hazardous waste and radioactive waste ratio	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average	409.11	524.54	<p>2022 Coverage: 24.88% Applicable Coverage – 54.56%</p> <p>2023 Coverage: 31.42% Applicable Coverage – 58.55%</p>	<p><b>Integration in index of VanEck ETFs</b> For certain Article 8 ETFs and all Article 9 ETFs VanEck utilises ESG data relating to waste and more specifically hazardous waste in some cases. For the relevant Article 8 ETFs, data from ESG data providers is used for the screening of investments and exclusion companies based on performance. Company performance may be in regards to discharges and releases of hazardous</p>

						<p>waste in the supply chain as part of an ESG score.</p> <p>For all Article 9 ETFs, Norm-based research is conducted on waste whereby companies with poor waste management, failure to prevent pollution or their ability to mitigate the production and distribution of hazardous substances are excluded in case of very severe score.</p> <p>For the remaining Article 8 and all Article 6 ETFs , the indicator is not considered in the index construction.</p>
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2.56%	1.85%	2022 Coverage: 92.60% 2023 Coverage: 94.05%	<p><b>Integration in index of VanEck ETFs</b></p> <p>For certain Article 8 ETFs and all Article 9 ETFs VanEck utilises ESG data relating to violations of international norms.</p> <p>For the relevant Article 8 ETFs, data from ESG data providers is used for the screening of investments and exclusion of companies based on performance.</p> <p>Company performance may be in regards to social, governance components, fundamental human rights, non-discrimination, diversity, elimination of child and forced labour, fundamental labour rights. Social standards in the supply chain may also be considered for controversy risk score.</p> <p>For all Article 9 ETFs, Norm-based research is conducted on union rights, workplace discrimination, overall severity, child labour, human rights, forced labour, labour standards and failure to conduct human rights due diligence. Companies are excluded in case of a very severe score.</p>
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for	21.44%	26.56%	2022 Coverage: 88.22% 2023 Coverage: 91.74%	

		<p>Multinational Enterprises</p>				<p>For the remaining Article 8 and all Article 6 ETFs, the indicators are not considered in the index construction.</p> <p><b>Engagement in VanEck ETFs</b>  VanEck intends to engage, during the next reference period, with some companies which are components of the Indexes of several VanEck ETFs, via a third-party.</p> <p><b>Voting VanEck ETFs</b>  For all equity ETFs, the Glass Lewis ESG tilted policy is applied, whereby it supports proposals requesting that companies disclose reports on workforce diversity.</p> <p><b>Integration in Active Funds (Article 8)</b>  Exclusion of companies that are involved in social and employee (i.e., serious violations of individuals' rights in situations of war or conflict), violation of human rights, gross corruption and other particularly serious violations of fundamental ethical norms in accordance with the Norges Bank Exclusionary list.</p> <p><b>Engagement in Active Funds (Article 8)</b>  Engagement is integral to the Active Funds. During the investment period, the active Investment Teams engage with management and raise sustainability issues relevant to that investment and industry. The Investment Teams continue to engage with and monitor the investments throughout the investment cycle.</p> <p><b>Proxy Voting in the VE EME UCITS Fund (Article 8)</b>  Principal adverse impacts are considered as part of the Glass Lewis voting policy, whereby</p>
--	--	----------------------------------	--	--	--	--

						casted votes regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.
	12. Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	0.36%	0.09%	2022 Coverage: 1.66% 2023 Coverage: 8.49%	<p><b>Integration in index of VanEck ETFs</b> For certain Article 8 funds and all Article 9 ETFs VanEck utilises ESG data relating to the gender pay gap. For these funds, Norm-based research is considered on the failure to provide equal work pay. Companies are excluded in case of a very severe score. For the remaining Article 8 and all Article 6 ETFs, the indicator is not considered in the index construction.</p> <p><b>Voting VanEck ETFs</b> For all equity ETFs, the Glass Lewis ESG tilted policy is applied, whereby it supports proposals requesting disclosure from companies regarding gender pay inequity.</p>
	13. Board gender diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	25.38%	12.17%	2022 Coverage: 37.36% 2023 Coverage: 75.29%	<p><b>Integration in index of VanEck ETFs</b> For certain Article 8 funds and all Article 9 funds VanEck utilises ESG data relating to board gender diversity. For these funds Norm-based research is conducted on the failure to provide equal pay for work. Companies are excluded if of a very severe score. For the remaining Article 8 and all Article 6 funds, the indicator is not considered in the index construction.</p> <p><b>Voting VanEck ETFs</b></p>

						For all equity ETFs, the Glass Lewis ESG tilted policy is applied, whereby it supports proposals relating to companies' policies and actions with respect to board refreshment and diversity.
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%	0.00%	2022 Coverage: 92.72% 2023 Coverage: 94.09%	<p><b>Integration in index of VanEck ETFs</b> The exclusion of cluster munition is legally required for all funds. In addition, various controversial weapon screenings are performed whereby companies with a Red score are excluded from the index. In addition, more expansive exclusionary screenings are applied to Article 9 funds relating to the exclusion of companies involved in controversial weapons, and manufacturing of firearms sold to civilian customers. In addition companies are excluded with activities in controversial sectors going beyond defined thresholds such as weapons, military and the exclusion of nuclear weapons.</p> <p><b>Engagement in VanEck ETFs</b> VanEck intends to engage, during the next reference period, with some companies which are components of the Indexes of several VanEck ETFs, via a third-party.</p> <p><b>Integration in Active Funds (Article 8)</b> Exclusion of companies that are involved in production of nuclear weapons and production of cluster munitions in accordance with the Norges Bank Exclusionary list.</p> <p><b>Engagement in Active Funds (Article 8)</b> Engagement is integral to the Active Funds. During the investment period, the active Investment Teams engage with management and raise sustainability issues relevant to that investment and industry. The Investment</p>

						<p>Teams continue to engage with and monitor the investments throughout the investment cycle.</p> <p><b>Proxy Voting in the VE EME UCITS Fund (Article 8)</b> Principal adverse impacts are considered as part of the Glass Lewis voting policy, whereby casted votes regard the environment, energy efficiency, the use of renewable energy sources, enhancing the rights of workers, violation of international human rights standards, gender pay inequity and board diversity.</p>

**Description of policies to identify and prioritise principal adverse impacts on sustainability factors**

The Responsible Investment Policy describes VanEck’s philosophy in considering environmental, social, and governance (“ESG”) factors in its investment processes. The Responsible Investment Policy has been approved by the board on 2 November 2022 and is revised when necessary. This can be found [here](#). In addition to the Responsible Investment Policy, a tailored approach is determined for the ETFs and Active Funds which VanEck manages. In the construction of the funds’ investment policies, the consideration of principal adverse impacts for each fund is determined. The fund’s specific approach is described in the fund documentation, which is approved by the board at the moment of the fund’s creation and in the case of fund documentation amendments.

**Allocation of responsibility for implementation**

The responsibility for the implementation of policies within organisational strategies and procedures is allocated to the European ESG Committee. VanEck has created a European ESG Committee, which assists with the integration and implementation of sustainability legislation, ESG strategies and sustainability characteristics. The measurement, analysis and consideration of principal adverse impacts on sustainability factors is one of the recurring responsibilities of the European ESG Committee. The way in which adverse impacts are considered and the Responsible Investment Policy is implemented differs between the types of funds and investment approaches. The majority of VanEck’s investment funds have a passive investment strategy, whereby an index is followed. For certain indices that VanEck ETF’s replicates, certain principal adverse impacts on sustainability factors are directly considered in the construction of the index. Additionally, for the Active Funds, certain adverse impacts are considered as part of the investment process and can be addressed by means of engagement, which is executed by the

active investment teams. The Glass Lewis ESG voting guidelines apply to all equity ETFs and strategies. Glass Lewis manages proxy voting, policy implementation, recordkeeping and reporting of voting activities.

### **The methodologies to select the indicators**

VanEck views adverse sustainability impacts on sustainability factors as principal based on the severity and likelihood that the adverse impact will materialize. The principal adverse sustainability impacts addressed by VanEck ETFs can be regarded as the most controversial subjects, which from an environmental, social and governance perspective are relevant for investing in companies. The main sustainability factors are environmental matters such as greenhouse gas emissions, biodiversity, and compliance with labour, human rights and corruption norms as laid down in various international standards such as UN Global Compact. Other principal adverse impacts concern the involvement of companies in controversial sectors such as cluster munition and other controversial weapons, fossil fuels, tobacco, adult entertainment or the gambling industry. In addition, VanEck considers and reports on two additional principal adverse impacts, concerning natural species and protected areas and the anti-corruption and anti-bribery sector.

For the Active Funds, ESG performance is used to determine which adverse impacts are relevant for a specific company.

For certain active investment strategies, an exclusion list applies whereby companies with activities in controversial sectors are identified.

### **Data sources**

For the reporting on the principal adverse impacts, data provided by Institutional Shareholder Services ESG (ISS ESG) is utilized. For the integration of principal adverse impacts in various investment policies of the funds and in the voting activities, various ESG data sources not limited to ISS ESG, are used. This means that reports will occur on different data sources than what is integrated in VanEck ETFs' indices. The correlation between varying ESG datasources is considered to be quite low. There are limitations to ESG data aside from reported data and estimations are also used. In addition, there is not yet a full data coverage for all of VanEck's assets under management.

### **Engagement policies**

As part of VanEck's bottom-up investment process, its Active Investment Teams seek to meet, when possible, with investment management and representatives of debt issuers, prior to investing. Once the Active Funds invest in a company, VanEck seeks to continue to have regular dialogue with investment management and where relevant, raise ESG issues pertinent to that investment and industry. It may, for example, discuss a board's focus on ESG or, more specifically, an investment's environmental record, safety record, community engagement, energy and resource efficiency or labor relations. When VanEck raises ESG-related issues during these meetings it does so, among other reasons, in order not only to have a better understanding of goals and risks, but also to understand better, and advocate adherence to, best practices. In addition, VanEck tends to engage on such issues when asked to by companies or corporates themselves. The Investment Teams will monitor the principal adverse impacts reported on during the previous period and will consider the possibility of taking specific actions pertinent to that investment and industry, based on the report results.

The ETF's engagement is limited to dialogues with the index provider in further refining the index rules and can relate to the increasing consideration of sustainability factors in composing the index. Engagement activities are delegated to an independent third-party engagement specialist, Glass Lewis Europe Limited. The engagement provider determines the engagement approach in accordance with its engagement policy and based on its engagements' priorities.. The shareholder engagement policy can be found [here](#).

### **References to international standards**

VanEck has been a signatory of the United Nations Principles for Responsible Investment (UN PRI) since 2017. No indicators are used to consider the principal adverse impacts on sustainability factors to measure the adherence or alignment with the UN PRI.

VanEck has been a signatory of the Carbon Disclosure Project (CDP) since 2023. No indicators are used to consider the principal adverse impacts on sustainability factors to measure the adherence or alignment with the CDP.

### **Historical comparison**

VanEck will report annually on the most important adverse effects on sustainability factors. An historical comparison of the reported indicators is included every year in this statement. The statement was first published in this format in 2023 and this statement published in 2024 represents the first historical comparison of the reported indicators.

The adverse impacts on sustainability factors in 2023 have changed for most of the mandatory indicators for investee companies and sovereigns compared to the previous reporting period 2022. This is largely due to the following occurrences:

- Changes in data quality and coverage: more data has been reported whereby estimations which were used in the previous reporting year have been corrected for reported data by underlying holdings
- The composition of the assets under management at VanEck has changed. The assets of mining and metal-related funds have increased, and these funds normally have worse scores on the adverse impact indicators compared to VanEck's SFDR Article 8 and Article 9 funds, negatively affecting the scores of the total investment portfolio.
- The VanEck's asset under management were 5.3 bn USD in 2022 and increased to 7.5bn in 2023 USD (46%). Consequently, the total portfolio-emissions of VanEck has increased.
