Past Performance as of 31 Dec 2023

There is insufficient data to provide a useful indication of past performance to investors. The Fund was launched on 01 September 2023.

Past performance does not predict future returns. Performance quoted represents past performance. Current performance may be lower or higher than average annual returns shown. Performance data is displayed on a Net Asset Value basis, in Base Currency terms, with net income reinvested, net of fees. Brokerage or transaction fees will apply. Returns may increase or decrease as a result of currency fluctuations. Investors must be aware that, due to market fluctuations and other factors, the performance of the ETFs may vary over time and should consider a medium/long-term perspective when evaluating the performance of ETFs. **Investing is subject to risks, including the possible loss of principal.** Source: VanEck.

Fundamentals*

Yield to Worst	6.48%
Yield to Maturity	6.59%
Effective Duration (yrs)	5.01
Years to Maturity	7.43
Modified Duration (yrs)	5.08
Coupon	5.40%

* These figures represent averages. **Yield to Worst** measures the lowest of either Yield to Maturity or Yield to Call date on every possible call date. **Yield to Maturity** is the annualized return on a bond held to maturity. **Effective Duration** measures a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield. This duration measure is appropriate for bonds with embedded options. **Modified Duration** measures a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield. **Years to Maturity** is the period of time for which a financial instrument remains outstanding. Maturity refers to a finite time period at the end of which the financial instrument will cease to exist and the principal is repaid. **Coupon** is measured by weighting the coupon of each bond by its relative size in the portfolio. Coupons are fixed percentages paid on a fixed-income security on an annual basis. Averages are market weighted. The Coupon and Yield to Worst do not represent the performance of the Fund. These statistics do not take into account fees and expenses associated with investments of the Fund.

Key Risks

Foreign Currency Risk: Because all or a portion of a Fallen Angels ETF is being invested in securities denominated in foreign currencies, the Fund's exposure to foreign currencies and changes in the value of foreign currencies versus the Base Currency may result in reduced returns for the Fund, and the value of certain foreign currencies may be subject to a high degree of fluctuation.

Emerging Markets Risk: Investments in emerging market countries are subject to specific risks and securities are generally less liquid and less efficient and securities markets may be less well regulated. Specific risks may be heightened by currency fluctuations and exchange control; imposition of restrictions on the repatriation of funds or other assets; governmental interference; higher inflation; social, economic and political uncertainties. That is one of the key risk factors of a Fallen Angels ETF.

High Yield Securities Risk: The prices of junk bonds are likely to be more sensitive to adverse economic changes or individual issuer developments than higher rated securities possibly leading to junk bond issuers not being able to service their principal and interest payment obligations. The secondary market for securities that are junk bonds may be less liquid than the markets for higher quality securities. This is another risk factor of a Fallen Angels ETF.

For more information on risks, please see the "Risk Factors" section of the relevant Fund's prospectus, available on www.vaneck.com.
